

Please do not allow the NAB petition 04-160 to pass. I choose to listen to XM Satellite Radio, and pay for the terrific quality of content they provide, because it is a better service than anything I can get locally. Plus, I can take it with me wherever I go.

It should not be up to the government or competitors to dictate what I listen to -- I have a choice and I choose XM Satellite Radio and their Instant Traffic and Weather reports.

Thank you.
